

Rapid Response XT Cabinets

Fast-tracking ADCs for COVID-19 Emergency Needs

We know the NHS is under pressure. A study by Cambridge University found ICU capacity was a crucial concern and said five out of seven commissioning regions in the UK were likely to struggle to meet demand due to the COVID-19 pandemic. In all areas, the capacity gap will be extremely challenging.

You've mobilised to meet the needs of this emergency and, as your healthcare technology and service partner, we have too. Omnicell is fast-tracking production and deployment of our XT Automated Dispensing Cabinets where they are needed the most, whether that's ICU/ED or new/repurposed care areas.

Speed Is Critical

We've removed barriers to ordering, shipping, and installation so you can scale your additional medication management and supply needs as soon as possible.

We have preconfigured XT medication and supply cabinets to offer you flexibility and maximum emergency impact. These have ample capacity and flexibility to meet a wide variety of needs, while maintaining the security, safety, and workflow efficiency features your clinicians expect.

We are committed not only to this condensed delivery timeline, but also to ensuring you have the support you need to focus on patients.

To give you the flexibility you'll need, we're making our most versatile cabinet and drawer option available to deliver in 14 days

Quick to Order

Simplified procurement process with special pricing and flexible payment terms. We will manufacture your cabinets based on a signed pricing supplement.

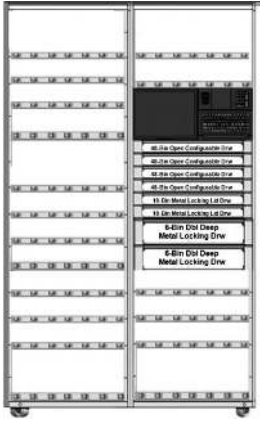

Quick to Ship

Standardised preconfigured XT cabinet options for both medication and supplies, based on best practices for ICU/ED areas. We'll deliver your cabinets to your hospital 14 days after your order is placed.

Quick to Care

You can choose the installation option that best meets your needs, either self-install with remote support or on-site install with training.
