

## Omnicell® VBM 200F

## Automation for SureMed® adherence cards

The only automated pharmacy solution that efficiently and accurately fills and checks SureMed® adherence cards. Our new filling machine ensures pharmacies have the competitive advantage to easily scale their business to improve adherence and patient outcomes today.

#### Benefits for your business and patients

- improved accuracy and reduced checking time
- ability to track and trace each medication packed
- identifies each drug packed
- adherence cards support patients to live
   better for longer improving health outcomes
- small-footprint, ergonomic design that fits through a standard doorway
- ease of access for cleaning and maintenance
- extremely intuitive and easy-to-use interface

Integrates with **Omnicell's eMAR solution** - our award winning eMAR solution for care homes that automates the entire medication management and administration process, making it safe, simple and compliant for everyone involved. Both pharmacy and care homes can have complete traceability from the moment medications are dispensed to being administered.

# Increase your pharmacy's revenue and decrease your expenses

- free up staff time and reduce your operating costs
- process 35-40 sealed and audited cards per hour
- assemble more packs with less resource
- supports hub and spoke model to improve efficiency and reduce costs

### Automation for SureMed® adherence cards

### SureMed® by Omnicell multi-medication adherence cards

Our new filling machine uses our SureMed® Class B certified, weekly pill packs which are designed to improve patient adherence by clearly organising and labelling multiple medications. Using the packs and the filling machine offers our customers and their patients numerous benefits:

- patient specific information and photo printed on the front of the card
- consolidated label printed on the inside cover of each card, including drug images
- potential to include individual pharmacy branding to the front of the card
- option available to print front and inside labels directly to the card

Class B is a standard of repackaging solid oral medication into a container.

The standard assures a dependable barrier against moisture once the container is properly sealed.
