

De-Blister Machine (DB500)

The quickest and easiest way to de-blister medication

Take the strain and pain out of removing tablets from their packaging with our de-blister machine (DB500), designed specifically to transform the time-consuming task of de-blistering.

This compact desktop machine not only reduces the risk of repetitive injuries and sore fingers from de-blistering by hand, it's also quick to set-up for different medication packs with no tools needed.

Designed to work with the vast majority of medication packs used in today's pharmacy, the DB500 can de-blister up to 280 capsules or tablets per minute.

It's simple to clean and maintain and comes with a safety clamp to secure the unit to your workstation when in use.

We'll provide a comprehensive DVD and instruction manual to help you use the DB500 with confidence. It's so straightforward to use that operators can be trained in a matter of minutes.

Like all Omnicell products, the DB500 is designed to support you in providing a valuable service to your customers and to support them in taking the correct medication.
